I'll be the OPA contact on this site. I have worked on Omaha Lead for >13 years, so it makes sense that I keep this one! Just as an FYI.....when we did initial sampling in Omaha (way before the site was listed on the NPL), we took numerous samples in Council Bluffs due to the wind patterns and the deposition from the former refinery. If you are interested in reviewing any of the past sampling outcomes or knowing more about the history, you may want to talk to Don Bahnke or Gene Gunn to discern if the area EPA is anticipating sampling is in the vicinity of our past sampling.

I'll start working on the fact sheet now.

Thanks.

Debbie

Fact sheet says that sampling will be conducted first week of June....so.....at least by then or quicker if you want to be more involved.

To all:

I have received your draft Fact Sheet and subsequent information about the potential site in Council Bluffs, however, OPA Management has not determined who will be working on the site. Didn't want you to think I dropped the ball!

Please let me know what your timing is, and I will elevate it again.

Thanks much ☺

Debbie
